# ADVANCED NATURAL TERRARIUMS

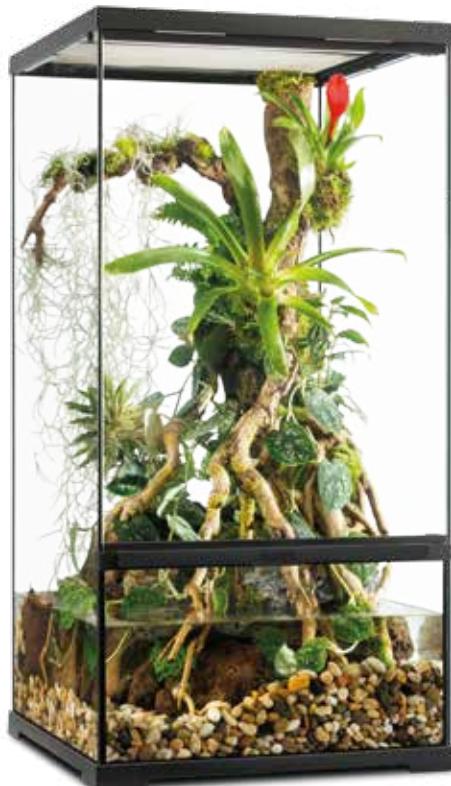

PRO TERRARIUM  
& PRO PALUDARIUM

## Form meets Function

Discover the sophistication of the Exo Terra Pro Terrarium™ and Pro Paludarium™, where cutting-edge design meets unparalleled functionality. Designed by European herpetologists, the Advanced Natural Terrarium is the ideal housing for your reptiles, amphibians, or invertebrates.

- Seamlessly blends aesthetics with function
- Adjustable Ventilation System to prevent condensation
- Lockable (dual) front door(s) to prevent escape
- Removable & Lockable Top for Easy Maintenance
- High Quality Stainless Steel Screen for optimal UVB penetration
- Raised Bottom Frame
- Efficient cable & tube management
- Monsoon ready (not included)
- Easy accessible top & front
- Deep waterproof bottom (with drain for the Pro Paludarium)
- Increased dwelling space

## Features:

Removable & Lockable Top for Easy Maintenance

Lockable front door to prevent escape

Monsoon ready

Efficient cable & tube management

Adjustable Ventilation System to prevent condensation

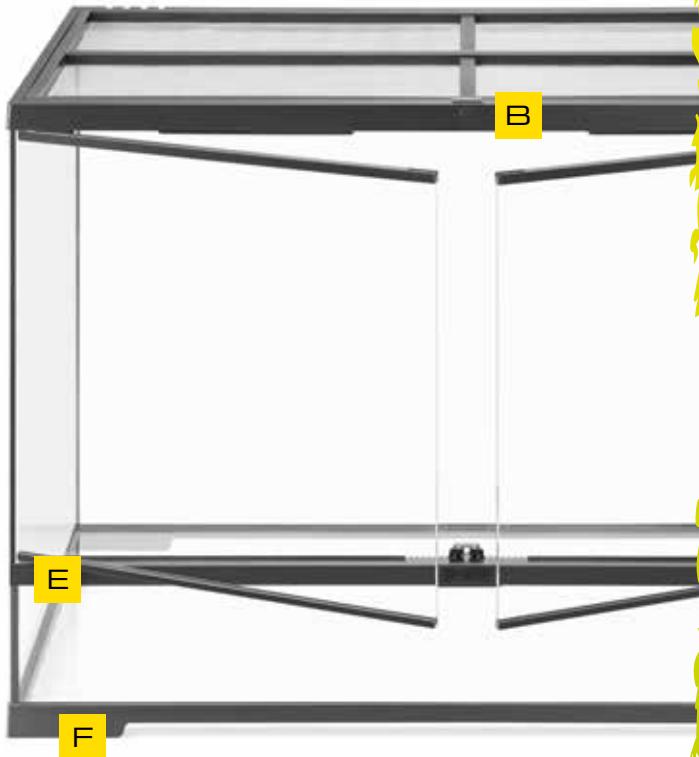

NEW

## ADJUSTABLE VENTILATION SYSTEM

Its concealed ventilation maintains a clean aesthetic, infusing the terrarium with an elegant touch. Beyond aesthetics, this terrarium offers an **advanced three-tier adjustable airflow system**, giving you precise control over the environment.

The patented forced vertical airflow is designed to prevent condensation effectively, ensuring clear views and a healthier habitat. The improved air circulation is crucial for the respiratory health of reptiles and amphibians. The integrated dirt collector captures any escaping dust or sand from the vent holes, ensuring a mess-free environment. (E)

## RAISED BOTTOM FRAME

The Pro Terrarium™ features a low-front glass panel that enhances visibility, providing a clearer and more immersive view of your terrarium's inhabitants.

The increased dwelling space of the Natural Terrarium offers numerous advantages for the physical and psychological well-being of reptiles and amphibians. The additional space will allow you to create diverse microhabitats within the terrarium, including different temperature gradients, humidity levels, and hiding places.

The raised bottom frame of the Advanced Natural Terrarium provides a convenient and secure platform for the effortless mounting of a Heat Mat. (F)

## LOCKABLE DOOR(S) TO PREVENT ESCAPE

The **front opening door** (\*) is equipped with a spring-loaded push latch, making accessibility both smooth and straightforward. The integrated lock is designed to prevent accidental door openings, ensuring the safety of your animals. (\* PT4400, PT4401, PT4403, PT4404, PT4405)

The **dual front opening doors** (\*\*) are equipped with a spring-loaded push latch, making accessibility both smooth and straightforward. The integrated lock is designed to prevent accidental door openings, ensuring the safety of your animals. (\*\*) PT4407, PT4408, PT4409, PT4411, PT4412, PT4413) - (B)

## MONSOON-READY

At the back of the terrarium, there are six self-closing inlets for wires or tubing. Inside, gutters have been thoughtfully included for effective tubing management, and the specific attachment points for nozzles, facilitate the setup of an automatic misting system.
