Advisory Section

To ensure the safety of you, the installer, and your children, it is important that these instructions are read fully before commencing the positioning and installation of this product.

Tip: Do not fully tighten all bolts until instructed at the relevant assembly stage.

Safety

This product has been designed and tested to rigorous European Safety Standards to ensure the safety and security of children using this product. It has been designed and manufactured for:

- Domestic outdoor use only and must not be installed within a public area such as a school, public house garden, communal play area, etc.
- Children between the ages of 3 years and 12 years old whilst being supervised by a responsible adult
- Installation on a flat surface (slope less than 2%), otherwise there may be a risk of instability
- Installation on a suitable surface (i.e. it should not be installed over concrete, asphalt, tarmac or any other hard or broken surface)
- Use within a clear area where the nearest obstruction (fence, tree, laundry line, cable, etc.) is more than 2 metres away. This distance should be measured from the furthest point of the play set (i.e. the bottom of any slide or a swing at maximum extension)
- Consider position of playcentre as the slide (if supplied) will become hot under direct sunlight

Note: Whilst there are no metal surfaces that could become excessively hot in the sun, it may be appropriate to ensure that the slide chute is not facing the main direction of sun to prevent the surface being uncomfortably warm in play. Maximum user weight 50Kg.

Finally, the safety of children using this product is your responsibility. It is advised that children are supervised at all times. Do not allow children to wear loose articles of clothing (i.e. tassels or loose hair) when using item else a possible entrapment may occur. Care must be taken to use the equipment for its intended purpose, i.e. do not allow children to climb onto items not designed for that purpose, as injury may result.

Timber Advice

This product has been made from premium timber. Great care has been taken in selecting, treating and machining the timber before it is presented to you. Timber is a natural product and as such may experience changes throughout the course of its life. This means it may:

- Develop openings (gaps, slits, apertures, cracks, splits) along the line of the grain. These openings are due to the difference in moisture content between the internal and outer surfaces of the timber. This is to be expected, is totally acceptable and will not affect the integral strength, life or guarantee of the product.
- Warp and distort its shape. Any distortion will be slight and will not affect the safety or enjoyment of this product.
- Fade as the timber reacts with sunlight. The timber should be treated with a proprietary product to act as a protective barrier, i.e. a water repellent, on an annual basis.

Biocidal Products Regulations EU 528/2012

Wolmanit Cx treated wood is a treated article that incorporates biocidal products:

copper hydroxide carbonate /II/ and boric acid. They protect wood against decay /rot/ and insect attack. keep away from food, drink and animal feeding stuffs.

Routine Maintenance

It is advised that on a regular basis (i.e. at the beginning of the season and monthly thereafter) all main parts/ fixings are checked as secure, well oiled (if metallic), have no sharp points/edges and are intact. Replace, oil and/or tighten when necessary. Failure to do so may result in an injury or hazard.

Any attachments such as swings, chains, ropes, etc must be regularly examined for evidence of deterioration. Replace any attachments if there are signs of deterioration. Failure to do so may result in an injury or hazard.

During long periods of non-use (particularly during the winter) it is suggested that attachments such as swings are dismantled and stored in a dry environment. This will prolong the life of such attachments.

Remember to keep these instructions in a safe place for future reference.

placez sur une surface à niveau à au moins 2 m de distance d'une structure ou d'une obstruction quelconque

ne doit pas être installée sur du béton, de l'asphalte ou d'autres surfaces dures

veiller à ce que le toboggan ne soit pas face au soleil pour éviter que la surface ne soit trop chaude.

N'oubliez pas de garder ces instructions dans un lieu sûr pour référence ultérieure.

l'ancrage doit être installé pour éviter que le cadre ne se soulève en cours d'utilisation

Il est conseillé d'inspecter régulièrement (à savoir au début d'une saison et chaque mois ensuite) le bon état des parties principales et des fixations, que tout soit bien huilé (dans le cas de pièces métalliques), à ce qu'il n'y ait rien de saillant et à ce que tout soit intact. Remplacez, huilez et/ou resserrez le cas échéant. Le non suivi de ces précautions risque de blesser ou de poser un danger.

Tous les accessoires attachés tels que les balançoires, les chaînes, cordes etc. doivent être régulièrement inspectés pour déceler la présence de détériorations. Remplacez les accessoires attachés en cas de signes de détérioration. Le non suivi de ces précautions risque de blesser ou de poser un danger.

ACHTUNG!
