

# Safety Instructions

- Do not swallow or inhale bioethanol directly. Avoid skin contact.
- Keep out of the reach of children and animals.
- Keep away from open flames or sources of sparks.
- Bioethanol is a highly flammable liquid, always use with care
- Only use bioethanol as fuel for suitable fireplaces and burners
- Do not smoke while handling bioethanol.
- Spilled bioethanol can cause stains on parquet floors.
- Bioethanol should be stored at room temperature to make it easier to light
- Bioethanol must be stored several meters away from the fireplace, preferably in a separate, dark and ventilated room
- **Never pour bioethanol into the burning flames of the fireplace!**
- **Never pour bioethanol into a fireplace (burner) that is still hot!**
- **Wait at least 30 minutes** after the fireplace is empty before refilling it
- Do not touch the fireplace during and shortly after operation, it heats up considerably
- Do not move the fireplace while it is in operation or when it is turned off and there is fuel in the burner.
- Bioethanol needs oxygen to burn, make sure that the room in which your fireplace is operated is well ventilated.
- Never leave the fireplace burning unattended.
- Always have a suitable fire extinguisher within reach
- Supervise children, animals and third parties during use
- Do not install near electrical cables and the like
- Do not use in caravans, boats and other vehicles
- Installation and use in publicly accessible buildings is subject to compliance with the regulations and the approval and control procedures of the responsible authorities
- Caution! The device emits combustion products, the fireplace must be installed or mounted in a well-ventilated room.
- Make sure to keep the following objects particularly far away from the fireplace: curtains, drapes, plants, textiles and the like.
- Avoid strong drafts that can affect the flames
