AVERTISSEMENT : Cet emballage contient de petites pièces et des pointes acérées dans son état non assemblé. Tenir hors de portée des enfants. L'assemblage doit être effectué par un adulte.

Avertissement :

Pour faciliter votre installation, ne coupez pas la courroie avant la fin de l'installation ! L'écart de la porte n'est PAS un problème ! Il sera réduit à 0,2 cm après l'installation.

L'écart entre les portes n'est PAS un problème ! Après l'installation, il sera réduit à 0,2 cm.

NE PAS COUPER LA COURROIE
Avant la fin de l'installation

Remarque : Vissez les coupelles de montage lorsque vous utilisez la barrière dans des escaliers.

**Bas de l'escalier**

Si la barrière est utilisée au bas d'un escalier pour empêcher l'enfant de monter, elle doit être installée sur la marche la plus basse.

Plancher

**Haut de l'escalier**

Si la barrière est utilisée en haut de l'escalier pour empêcher l'enfant de tomber dans l'escalier au-dessous du niveau de la marche supérieure.

ÉTAPE 1. Mesurez la largeur des portes.

Suivez les suggestions de combinaison d'extension ci-dessous pour installer la barrière.

**Étape 2 :**

Insérez 4 boulons dans les 4 coins de la barrière/extension.

ÉTAPE 3.

Pré-assemblez la barrière et repérez quatre points pour le perçage des trous. Maintenez la coupe murale en position et marquez le centre avec un crayon.

REMARQUE : la barrière doit reposer sur le sol. NE laissez PAS un espace de plus de 0,5 cm entre la barrière et le sol.

**ÉTAPE 4.**

Collez le tampon si vous utilisez une installation à pression. Retirez les deux côtés du tampon adhésif et collez 4 tampons sur 4 supports muraux. Les supports muraux recouvrent ensuite les boulons.

CONSEIL : si vous ne craignez pas d'endommager les murs, passez cette étape.

**ÉTAPE 5.**

Percez un trou aux 4 emplacements marqués, puis placez la cheville pour cloison sèche (g) et utilisez la vis (f) et la coupelle murale (d).

L'outil d'installation n'est pas fourni avec le produit.

Serrez le haut des boutons de tension en les tournant en même temps dans le sens des aiguilles d'une montre.

Remarque : Assurez-vous que le bas du cadre de la barrière reste complètement plat sur le sol.

Ensuite, serrez simultanément les boutons de tension du bas et du haut en les tournant dans le sens des aiguilles d'une montre.

Faites tourner les 4 boulons.

Tournez les boulons jusqu'à ce que l'écart soit d'environ 0,2 cm.

ÉTAPE 7.

Coupez la courroie et testez la barrière :

- 1.Poussez la barrière pour vérifier sa stabilité.

- 2.Ouvrez et fermez la porte de passage

Méthode d'Ouverture:

Tirez le bouton vers la droite, puis soulevez le panneau de la barrière vers le HAUT pour l'ouvrir.

TERMINÉ

Si votre escalier est doté de colonnes rondes, veuillez acheter 2 vis en U supplémentaires.

Installez avec la vis en forme de U lorsqu'elle est placée sur une colonne ou le diamètre du lieu d'installation est inférieur à 1,2.

Le produit ne comprend pas toutes les pièces. Contactez le distributeur pour plus d'informations
