

Polarshine® MARINE

HEAVY CUT COMPOUND

Technical data sheet

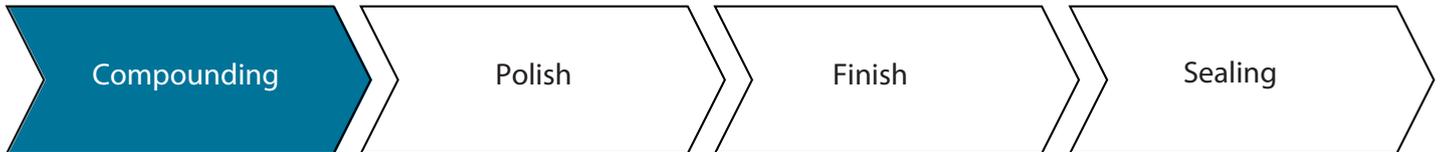

Product information

Water borne, silicone-free polishing compound designed to quickly and permanently remove heavy oxidation, deep scratches and sanding scratches from grit 800 and finer, leaving a high-gloss finish.

Product advantages

- Removes scratches from grit 800 and finer quickly and permanently
- Removes heavy oxidation and restores colour and shine
- Water borne and silicone-free

Surfaces

- Gelcoat
- High gloss lacquers
- Vinyl ester and Epoxy
- High gloss polyester paints

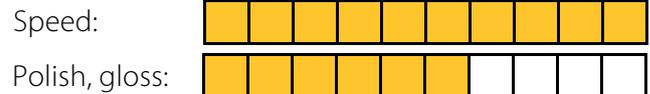

Polishing machine

- Rotary polisher 1000 – 1500 rpm

Polishing pad

- Twisted wool
- Lambswool

Product properties

Work instruction

1. Shake or stir the polishing compound before use.
2. Do not use too much compound. Use a small amount on a focused area at a time = less mess and saves time cleaning!
3. Clean thoroughly before and after polishing.
4. Work focused on an area of 40x40 cm at a time.
5. Polish until a scratch free surface is achieved.
6. Wipe the surface with a microfiber cloth after application.
7. Keep the pad clean, a dirty pad causes deep swirls and scratches.

Technical specifications

Density: ca 1.23 g/ml
 Viscosity: ca 37 000 cP
 Colour: White
 pH: 2.5-4.5

Storage recommendations

Recommended storage temperature:
 5° - 35° C / 41° - 95° F
 Keep from freezing
